

SECTION 12.0
TRAFFIC CONTROL DEVICES AND STREET NAME SIGNS

12.1 **General**

12.1.1 The Developer, or his Engineer, shall prepare an overall plan of the subdivision on which is shown proposed traffic signs, traffic control devices and street name signs.

12.1.2 This plan shall be submitted to the Town for review with the detail design drawings.

12.2 **Traffic Control Devices**

12.2.1 Standard traffic control devices, including signs and crosswalks, shall be provided by the Developer and shall be in accordance with the "Manual of Uniform Traffic Control Devices" of the Transportation Association of Canada (TAC).

12.3 **Street Name Signs**

12.3.1 Reflectorized street name units, of the type and colour satisfactory to the Town, shall be constructed of extruded aluminum.

12.3.2 Fastening brackets shall be part numbers ID25 and ID26, as per Alberta Traffic Supply Ltd., or an approved equivalent.

12.3.3 Street name signs are to be mounted on 60 mm (2 3/8 inch) diameter metal posts with break-away flanges/vandal proof tops and shall be installed by the Town as per Approved Traffic Control Devices and Street Signs design drawing.

12.4 **Supply, Installation and Costs**

12.4.1 The Town will coordinate the supply and installation of the necessary traffic signs, traffic control devices and street name signs.

12.4.2 The Developer shall be responsible for the costs for the supply of the necessary signs and devices, and the Town shall be responsible for the costs of the installation.
